Declaration and assistance disclosure

Project: TARA Studio - Automotive Cybersecurity Assessment Assistant

Student name: _____

PRN / class / division: _____

Institution: PCCOE

I declare that the submitted project has been reviewed by me and that the contribution statement accurately describes the work performed by each student. I will not represent generated code, synthetic data or untested integrations as independently authored or experimentally validated work.

I acknowledge that an AI assistant helped generate the initial source code, synthetic data, documentation and evaluation utilities. My own review, modifications, testing and learning are described in the attached contribution record.

I understand that faculty approval, student signatures and expert automotive validation are not supplied by this software package. I will disclose all model, package, internet and external-service dependencies used for the final demonstration.

I confirm that reported results correspond to the submitted version and that any later changes will be evaluated and documented before submission.

Student signature: _____ Date: _____

Place: _____

Sign only after reviewing this declaration and completing the contribution/dependency record. Adapt wording to the institution's required declaration format.
